EDUCATION

University of California, Irvine

B.S., Computer Science — GPA: 4.0, Campuswide Honors Collegium

Irvine, CA

Expected Sep. 2025 – Present

EXPERIENCE

Software Engineer Intern

May. 2025 – Present

TensorStar

Remote

- Collaborating with engineers to build a real-time dashboard UI using **React, Tailwind CSS, and WebSocket integrations**.

Full Stack Engineer Intern

Mar. 2025 – Present

Todd

Remote

- Developing a **client-facing dashboard and company website** using **Next.js, Tailwind CSS, and Framer Motion**, integrating **AI-powered backend services** to visualize **real-time agricultural insights**.

Frontend Developer

Sep. 2024 – Apr. 2025

AdeptEye

Walnut, CA

- Revamped **TeaSpots'** Squarespace site to **reduce load times by 40–50%** and improve **UX**, leading to higher engagement and **1,800+ page views** in the first week post-launch.
- Customized **Century Strings'** Shopify storefront using **Liquid**, implementing **dynamic product filtering, dealer portals, and POS integrations** to streamline transactions and enhance functionality.
- Led **UI/UX improvements** and collaborated with **Century Strings'** stakeholders to align site designs with **branding and business goals**, working cross-functionally across design and development teams.

AI Engineer

Mar. 2024 – Apr. 2025

Outlier AI

Remote

- Optimized AI response pipelines** through **A/B testing**, evaluating **30-50 AI responses per session** to refine prompt engineering strategies
- Engineered a recursive self-improvement method**, leveraging **failure-based training prompts** to improve LLM reasoning and reduce incorrect trend-based responses by **15-20%**
- Designed evaluation strategies for prompt effectiveness**, analyzing response quality and identifying **hallucination patterns** to enhance model accuracy.

PROJECTS

Mt. SAC Computer Science Club Website | *Next.js, Tailwind CSS, TypeScript*

May. 2025

- Redesigned and rebuilt the official site for a **900+ member CS Club** using **Next.js, TypeScript, and Tailwind**, achieving **100% Lighthouse accessibility** and **under 1s LCP** on desktop.
- Implemented a **component-driven architecture** with dynamic routes, JSON-configured events, and advisor/officer directories, cutting content update time by **80%**.
- Boosted traffic by **10x** in the first month post-launch through improved UX, responsive design, and centralized event & member access—resulting in a **80% increase** in mobile user retention.

het.ai | *Leap Motion, FastAPI, Firebase, Next.js, Tailwind CSS*

Apr. 2025

- Built a **full-stack ergonomic tracking platform** that visualizes live hand posture using **Leap Motion sensor data** and **real-time angle calculations** (flexion, deviation, pronation).
- Spearheaded the implementation of the **frontend interface** in Next.js, displaying **animated hand skeletons** and diagnostic graphs using **React and Recharts**.
- Integrated **Firebase Firestore with FastAPI** to enable **high-frequency sensor data** ingestion and smooth visualization through **state interpolation**.

logit | *Next.js, Tailwind CSS, PostgreSQL*

Dec. 2024

- Built a full-stack workout logging app with an intuitive UI, enabling **seamless workout tracking and progress visualization**.
- Implemented a **react-calendar and Recharts** visualizations, allowing users to edit past sessions and analyze progress trends over time.
- Designed and optimized a **PostgreSQL database**, supporting tags, comments, and dropsets for flexible workout tracking and progressive overload analysis.

TECHNICAL SKILLS

Languages: Java, C++, SQL, Python, JavaScript, TypeScript, Liquid

Frameworks & Libraries: React, Next.js, Bootstrap, Tailwind CSS

Developer Tools: Git, GitHub, VS Code, Netlify, Vercel, Vite, Prisma

Relevant Courses: Data Structures & Algorithms, Linear Algebra & Differential Equations, Discrete Mathematics, OOP
